

MEDICAL HISTORY LESSON

Our MODERN DRUG BASED SYSTEM Is really the 'best' 'proven' 'dependable' method?? RIGHT??—THINK AGAIN!

What You Know That Isn't So:

A wise man once said, "Its not what we don't know that hurts us, Its what we know... that isn't so!"

A man bought a trained watch dog to guard his home and property. One night it barked at a thief. The man, so annoyed at having to leave his warm, comfortable bed, went down and shot the dog. I want to tell you a story, a scary story, but a true story. Like a lonely dog barking in the night, I want to warn you.

In this modern technical age, we are bombarded everywhere with half-truths and untruths. We don't live in reality. Many no longer know what is reality or truth. The Bible talks about

Medical History Lesson

perishing because of not *loving the truth*. In other words, "**My mind is made up--don't bother me with the facts!**"

It is said that statistics don't lie, but liars can twist statistics. Much of what we believe true these days is information manipulated and designed to mislead us and mold us into obedient, happy docile SHEEPLE--blindly accepting whatever big MEDICAL business wants to sell us.

Truth is found in nature and God's written word. Where do you think all these new diseases come from? They are not God given--they are man made! Don't listen to those who try to sell you the lie that it is because we are living longer these days, because of modern medical marvels, so people get more diseases. For one thing this is self contradictory. And why are these diseases increasing in children and young people? Is it 90 year old folk that are getting AIDS?

Life expectancy statistics fool us into believing people are living longer, when it is only because infant mortality rates are lower that it makes the difference in the statistics. You see if one person dies as an infant and another at 100 it averages out to 50. Where if two, each die at 60 it appears statistically that they are living ten years longer, but this is not the case.

What really improved the infant mortality rates anyway? Was it Modern Medical Know-how? No--it is better sanitation and hygiene--sewers, vacuum cleaners, refrigerators, better food supplies. THAT IS A PROVEN, DEMONSTRATED, SCIENTIFIC FACT!

Brief History of Our Modern Medical System:

The 22nd of April 1915, at 5 p.m. goes down in infamy--Troops near Langmark and Ypres saw 2 flares fired, then 2 greenish-yellow clouds rising from the German lines and moving towards them. As German pioneers opened the valves on 6,000 cylinders of liquid chlorine, it instantly vaporized as it hit the air and hissed out to form a dense cloud. At 30 parts per million it causes a rasping cough, at 1 part per thousand it is fatal. Chemical warfare had dawned and we had been catapulted into the chemical age.

In WW1 over 113,000 tons of deadly gasses were released over Europe, killing all they touched.

In WW2 there were tremendous stockpiles of deadly nerve gas, so deadly that a drop on the skin can kill. The Germans had it and it is a miracle it was never used. They thought the Allies had it too and didn't want it used on them. The Allies didn't have it at this time! In fact when they were warned about it they refused to believe it existed!

In 1945, tons of this deadly stuff was dumped into the river Oder in Germany to stop it from falling into enemy hands. There is enough nerve gas stockpiled in the US to kill everyone on earth 4,000 times over and they still think this supply is inadequate. In 1960-65, Rocky Mountain arsenal poured 165 million gallons of toxic waste into an underground reservoir and only stopped when earthquakes began to escalate; even the earth doesn't want the stuff!

What does all this have to do with Medical History?

In the 1800s and early 1900s, there were **many natural forms of health treatment available** and taught in North America. It was a rich time for research in these lines. Water cure and hydrotherapy came over from Europe; made famous in the spa of Father Kneippe. Jethro Trall and Sylvester Graham brought dietary and health reform programs before the people. Drs. Kellogg and Wood studied and taught colon therapy and exercise programs. Homeopathy, Naturopathy, Herbal and eclectic herbal medicine all were taught in the US.

Now we basically have only 2 modalities being used by the official medical world--Drug therapy and surgery--Here's how it happened:

In Germany, there was born a company called I. G. Farben (Interessen Gemeinschaft Farben) I. G. Farben Industrial Corporation was brought into being by two men, a German industrialist and a Swiss banker. It soon had the world monopoly on dyes. They were powerful. From its beginning I. G. Farben has been an integral part of the international banking structure. The US Department of Justice District court of New Jersey in 1942 reported, "I. G. Farben is the largest chemical company in the world and part of the most gigantic and powerful Cartel of all History."

In WW1 the head of IGF, Carl Duisberg, canvassed for introducing chemical warfare. He was a believer in the 'Furor principle' before Hitler was even thought of. He also owned 'Bayer' corporation, ever heard of that? His company lobby was decorated with a huge frieze depicting war-gas production. IGF also produced nitrates for WW1--more power!

Now to North America:

Ever hear of J. D. Rockefeller of Standard Oil? Well he formed a fund to seek control of education and medicine in 1901 and joined with Carnegie in 1908 who had similar aims. In 1928 They joined IGF becoming the biggest chemical cartel the world has ever seen--the biggest anything the world has ever seen!

The American Medical Association was formed in 1847 by G. Simons, Dr. McCormick, and Dr. Reed. Their aim was to improve and police the medical field. They didn't get very far due to lack of funds.

In 1901, the Rockefeller foundation was formed, whose aim was the control of education, and medicine etc. Their board consisted of: Dr. Holt, Dr. Hurter, T. M. Prudens, H. Briggs, Wm. Welsh, T. Smith, Simon Flexner, who had a brother, Abraham Flexner, who was part of the Carnegie foundation, planning to control all teaching and education. So they got together. In 1908 the president of the Carnegie foundation told the AMA they would take over.

Carnegie's foundation aimed to investigate all professions; Law, medicine, and theology. They examined all medical schools and gave grants to those that qualified. (that is those they approved of)

Medical History Lesson

The schools that would qualify had to be dedicated to promoting Pharmacology--treatment with drugs, chemicals and technology--and they had to set up departments of research in to promote drug therapy. In 1905, there were 160 medical schools in USA, and they included herbalists, naturopaths and other natural healing methods. By 1927 only 80 remained, the "scientific" tests that these had passed was to prove they would allow themselves to be controlled by the Rockefeller/Carnegie board, alias the AMA.

“Flexner had Ideas, Rockefeller had the money and their marriage was spectacular!”

To receive grants, the schools were required to enter drug therapy and chemical research.

The Rockefeller institute for Medical Research was established and by 1928 had received \$65 million in endowments from J. D. Rockefeller.

Other private sponsors of research were pharmaceutical companies which grew rapidly after the 1920s. An estimate in 1945 put the research expenditures of the drug companies at \$40 million compared to \$25 million for foundations, universities and institutes. Don't you think they would protect their investment?? Rockefeller was the kind of man that would never give \$1.00 unless he would get \$5.00 back, and as top man in Standard Oil in the US, you can see why the interest in chemicals and drugs. They didn't look for what would give the best healing results--but for what would make the most money. Our staggering health care costs show how well they succeeded.

David Hopgood wrote in 1969, in *Washington Monthly*, “The Medical school curriculum and its entrance exams are geared to the highly academic student who is headed for research. In the increasingly desperate struggle for admission, these academically talented students are crowding out those who want to practice medicine.”

G. E. Griffen, in his book ‘World Without Cancer’ states, “And so it has come to pass that the teaching staffs in all our medical schools are a very special breed. In the selection and training process, heavy emphasis has been put on finding individuals who have been attracted by the field of research in Pharmacology. This has resulted in loading the staffs of our medical schools with men and women who by preference and training are ideal propagators of the drug-oriented science that has come to dominate American Medicine.”

During WW2, I. G. Farben Company's huge plant complex in Germany, was not so much as scratched during heavy bombing raids on Frankfurt. Later American bomber pilots revealed they were ordered not to harm the massive structure--*even though it produced war gasses and ammo!* Why? In 1928, Rockefeller merged his empire with I. G. Farben. This outfit was not just drug oriented, but weapons and munitions as well. The only other outfit with that kind of power is the Vatican!

Drug medication was the payload and drug research the tool needed to promote it, and the medical schools backed by the political AMA, which was no more than a figurehead, defended its men in the use and abuse of chemicals.

Medical History Lesson

It was a Satanic method of subtle manipulation to destroy a people through the means of the so called “Art of Healing”. Tragically, the people have bought the system, to the point that they actually believe that health, vitality and life can be perpetuated by the swallowing of little pills of poisonous chemicals that are void of life themselves.

Most folk believe that the scientists studied out all the treatment methods and used what they found to be most effective--this is absolutely untrue! They are geared to drugs--forced to drugs--brainwashed to drugs--by the multi-billion dollar drug and chemical cartels.

In Canada the Pharmaceutical industry is the largest we have and they are linked also with the Vatican. They elect our governments--we only think we do--Only God has more power--and I thank Him that He does.

Life can only come from life: down deep in our hearts we know that. In the beginning God created man and breathed into him the breath of life and man became a living soul. He gave man his food, fruits of the trees and plants and the herb of the field. These if used in their simple, natural state would keep man well and healthy. And he gave man the special herbs to aid him when he was hurt or ill.

The plants and herbs have life within them and so they act in harmony with our living bodies to nourish and heal. Chemical drugs cause reactions in the body, the body rallies to try and discard the foreign element but lacking in life force themselves, the drugs serve only to further weaken the living machinery in the long run.

Vibrant health and healing that is lasting and complete, can only come from the use of the living things of nature and obedience to God’s accepted laws of health.

1906:

Let’s return to 1906, and another page of our story. Two years before Rockefeller and Carnegie foundation took over the AMA and educational reform in the medical colleges, E. G. White met with brethren in Loma Linda California. In 1904 Battle Creek was lost. Now the health work was beginning again on the west coast. We had learned our lesson . . . or had we?

Mrs. White got up and said that we must not be tied by so much as a thread to the policies of the world or of the AMA.

Elder Butler got up and stated that we should have followed the prophet in the past.

But Mrs. White and Elder Butler weren’t so young anymore. Acting president A. G. Daniels himself, had rejected time and again the health reform message, as it would put him in an embarrassing spot with the men under him who also were not practicing it. Now he was appealing to the young future men of medicine who stopped their ears from hearing the Servant of the Lord; for Daniels replied, “Brethren, as far as I am concerned, unless we are willing to be recognized by the AMA, you will not receive one dime from me.”

Medical History Lesson

In 1976 Loma Linda was 60,000,000 in arrears! In 1989, our health institutes carried a 1.5 billion dollar debt load. Today this time bomb still hangs over our denominational head.

If we could have seen what God saw! What a different school of medicine we would have today. But when He spoke--we wanted to be accepted by the world. Mrs. White wrote instruction that **drugs must never be a part of our message**. Man must be shown God's natural remedies.

“The patients could live out of doors a lot of the time. The land (Loma Linda) will serve as a school for the patients. By out door exercise and working in the soil, men and women will regain their health. Rational methods for the cure of diseases will be used in a variety of ways. Drugs will be discarded.” SpTB03b 14.2

People were to be taught to use diet and simple treatments they could use at home to gain health. Apparently God did not consider drugs to be a rational cure for diseases. But then Rockefeller and I. G. Farben could have told us that.

So we have come to the place where we call truth error, and error truth and know not who we worship. People who would teach you healthy diet and life-style and give you natural, God-given herbs, are considered Kooks, Quacks and Fanatics and not to be trusted; while people who would poison you with chemicals or cut you open are considered sensible and reliable.

Cancer Society:

May 1913, the American Cancer Society is born at the Harvard club in New York. It has been instrumental in taking many millions of dollars from unsuspecting people with absolutely nothing in return but a wake of pain, heartache and death. The AMA owns 1/2 the patent rights to 5fv, the chemical name given to the most popular toxic drug being used as the modern, acceptable method for treatment of cancer. When you realize that the drug is manufactured by the Hoffman LeRoche Laboratories which are directly related to the I. G. Farben and Rockefeller Cartel, then you can see the tie into the money making machine.

Another major institution which staked its claim in the virgin territory of cancer research in the 1930-1950s, was Memorial Sloane-Kettering Cancer Center in New York. Established in 1884, as the first cancer hospital in the US, from 1940-1950 it was the center of drug testing for the largest Pharmaceutical Companies.

Cornelius P. Rhoads, who had spent the 1930s at the Rockefeller Institute, became the director until his death in 1959. Rhoads was also the head of the nation's Chemical Warfare Service from 1943-1945 and afterwards became the nation's premier advocate of chemotherapy. According to Dr. Virginia Livingston-Wheeler, “Dr. Rhoads was determined to dictate the cancer policies of the entire country.”

It was Dr. Rhoads who prevented Dr. Irene Diller from announcing the discovery of the cancer micro-organism to the New York Academy of sciences in 1950. It was also Dr. Rhoads who arranged for the funds for Dr. Caspe's New Jersey lab to be cancelled after she announced the

Medical History Lesson

same discovery in Rome in 1953, and an IRA investigation, instigated by an unidentified, powerful New York cancer authority added to her misery; the lab was closed.

The American Cancer Society has enormous influence because its public appeals generate large amounts of money for 'research'.

Memorial Sloan-Kettering is closely tied to the American Cancer Society and was founded by John D. Rockefeller Jr. and his business associates. Ralph W. Moss, former assistant director of public affairs at M. S-K. cancer center made explicit: "The society now has tens of millions of dollars to distribute to those who favor its growing power, and many powerful connections to disconcert those who oppose it."

Yet with all this wealth at its disposal for so many years, and its purpose (supposedly) the eradication of cancer, the American Cancer Society has not been able to find those scientists who have scientifically isolated the cancer virus or those pioneer researchers and doctors who cured it in 1934 and afterwards; Bad Luck? Incompetence? or something more sinister and closer to the pocketbook?

Isn't it strange that we can put a man on the moon. We can launch a missile from anywhere in the world via satellite, and it is so accurate that it could put out the flame of a lighted cigarette should one care to hold it in his mouth during the experiment, that is. Yet we still can't find the cure for cancer? Has it ever dawned on us that it might not be in the interest of a multi-billion dollar industry to find a cure that would put them out of business? Not to mention the closing of hundreds of hospitals and research centers? And shut down scores of useless machines that cost millions to produce? No! the business is too good to close.

If you can make the people think you are really searching for the cure of cancer, while all the time you are building an empire behind their backs, the end result will be that dying people will give you their last dollar; hoping against hope that, one day, you will be able to cure them!

One case should show some of you the truth of all this:

The largest study that had ever been conducted anywhere in the world, was the Tri-state Leukemia study by Dr. Bretell and Dr. Bross of Rossville Institute for Cancer research. It involved 30 million people. Such an immense study had never been undertaken before. The study produced overwhelming evidence that Leukemia does increase when the use of such treatments as X-ray and radiation are used. In other words, the so called cure for cancer is actually contributing factor in its cause. What was the reward given for this scientific discovery? The US National Cancer Institute stopped all grants to that particular research body.

So Please! Don't expect the medical field to eagerly accept even documented evidence of natural cancer or other disease cures. Rather you will see them work to bury them and the people who dare to speak up about them.

HEALTH FRAUD?

We keep hearing about government and medical association backed programs to combat health fraud. I am against health fraud and I am sure every person here is against health fraud. But if you are going to be against health fraud, be against it in all aspects, not just health food stores, nutritionists and natural healers. I would like to read to you a transcript aired Feb. 23, 24, 25, & 27 1986 on TV in St. Paul's Minnesota, KSTP- entitled, "Too Quick to Cut." This information came from a government study that said every year in the USA 10,000 lives are lost because of it and \$4 billion wasted as 2 million surgical operations are performed NEEDLESSLY! I say, there is more health fraud in that one paragraph than is committed by the whole alternative healing industry!

There is a man who wrote a book called 'Hospital Hazards' The author states that each year, at least 100,000 lives are lost because of hospital acquired infections. This same topic was aired on Donahue. But according to the article in a Minneapolis paper, this is not so. Two doctors from the University of Minnesota who think they are as good as the Mayo clinic, probably they are, I don't know, wrote an article and said there are 75,000 lives lost because of hospital infections. So, somewhere between 75,000 and 100,000 must be the answer.

And what about all this wonderful research on cancer- Are they doing a good job there? An article in Business-week Sept. 1986 headlines "The New War on Cancer" That's right folks- the New War because we lost the old one. Read the first line of this article- "15 years and 13 Billion Dollars after USA declared war on Cancer, the progress is still grim." That was taxpayer's money given to the National Cancer Institute, and doesn't include what was given to the American cancer society or other private institutions that are in cancer research.

Drug Company Tricks:

Halcion scam

When the drug 'Halcion', a sleeping pill for seniors, was ready to be tested on people, the drug company, Upjohn, paid a doctor in a big city clinic to do the testing. In time, he duly sent in reports of a study that showed satisfactory performance and so the drug was released to the public.

It was discovered in 1986, that when patients were contacted and asked about the tests that no-one recalled any such tests! It was proven that this doctor had not done the tests and had sent in fraudulent data that he had made up.

However Upjohn still continued citing these 'studies' as proof of the safety of the drug- AFTER they were known to be false and DID NOT remove the drug from the market until actual testing could be done.

This drug is infamous for side effects and problems associated with its use. How many other drugs are out there under false credentials one is led to ask.

Medical History Lesson

In one study, dozens of over the counter medications, such as Dimetapp, Triaminic, and many well known 'remedies' were tested by the FDA and found to have NO benefits at all! The companies were warned to remove them from the market unless they could show proof of their claims—They did neither and the matter rests there!

Are Herbalists and Alternative Practitioners guilty of Health Fraud--or is it the Medical/chemical Moguls? You Decide!
